

Looking for quick and easy ways to integrate more digital learning in your **Foundation** classroom?

PERSONAL AND SOCIAL

#191 Make a video

Make a video (using a flipcam or iPad camera) of students sharing their term goals. At the end of the term, record their reflection of what they achieved and what they'd like to work on next. (VCPCSE002)

HISTORY

#098 Google Earth Visits

Find out where students' families come from and visit those locations using Google Earth software. Drop a pin (and save as a map) for future reference/lessons. (VCHHK058)

SCIENCE

#165 The World around us

Take a virtual 360° field trip with scientists to a range of landscapes in the USA. What do you notice about each landscape? What makes it different/same? (VCSIS053)

ENGLISH

#042 Film a book review

Use a digital camera or iPad camera to film a book review to share with the class. Create a collection of video reviews for students to access. (VCELT170)

DIGITAL TECHNOLOGIES

#185 Sharing information online

Watch a Hector's World video and discuss when students shouldn't share personal information and why people need to protect their identity. (VCDTCD018)

HEALTH AND PHYSICAL ED.

#082 Healthy eating collage

Take photos of healthy foods and create a collage of a healthy lunch using PicCollage app for the iPad or Windows AutoCollage software. Share collages on your school website or class blog. (VCHPEP062)

MATHEMATICS

#110 Virtual scales

Use a Virtual Pan Balance to represent equality with numbers. Students make the scales balance. (VCMNA072)
